Your Course Trainer – David Linton MFTA – 40 years' experience

'I just wanted to say that the course is an absolute bullseye. I've been a fan of David's work for decades and I think it is fundamentally critical for traders.' Senior Trader, Aramco Trading London

'After six months, I now use what I learnt on the course every day in my analysis and trading. It has been excellent for spotting trends and changes which has helped us position ourselves in the market more favourably.' Oil Trader, London

We are leaders in providing world class intensive Technical Analysis Courses to trading teams globally. Our courses are typically held over two days at the offices of financial firms where we focus on maximising the technical trading and analysis skills of the all members in the team.

Delegates who take our Technical Analysis Training Courses tell us time and time again how valuable these courses are and how it makes such big a difference to their trading and analysis skills. But don't take our word for it, just see what they have said about our training in recent months.

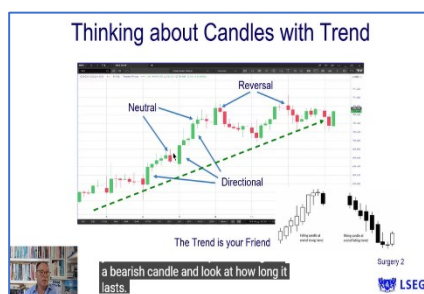

'Thank you for the time and effort you invested in delivering the technical analysis training to our team this week. I've heard nothing but positive feedback from my colleagues. They found the training highly insightful and engaging, which reflects the expertise and dedication you brought to the sessions. I truly value the partnership we've built. Thank you once again for your support and for sharing your knowledge with the team.'

About Us

We specialise in corporate training and software that develops traders, analysts, fund managers, asset allocators, systematic traders and hedgers across asset classes. We help build teams, improve profitability while reducing risk and overall team performance.

Our philosophy is simple: We start with observing and assessing your specific training requirements. We then design courses to meet those needs. Our decades of experience in Technical Analysis gives you the best Technical Analysis Training you will find anywhere.

Our approach has worked for traders and investment managers in hundreds of firms.

David Linton MFTA

David started out in Technical Analysis trading on the London Traded Options market in the 1980s. He studied in civil engineering at King's College, University of London.

After graduating he set up Updata where over the years he has become one of the UK's best known technical analysts and market commentators.

He has taught technical analysis to traders from hundreds

of trading firms in over 30 countries over many years and has been a speaker at numerous financial conferences. He is a lecturer for the UK Society of Technical Analysts Diploma course.

David holds the Master in Financial Technical Analysis (MFTA) awarded by the International Federation of Technical Analysts as well as having passed the exams for Certified Technician CFTe and the STA Diploma, MSTA. He is a member of the American Association of Professional Technical Analysts.

David is author of 'Cloud Charts, Trading Success with the Ichimoku Technique' and a leading expert on the subject. He presents the Technical Analysis Masterclass each month for the London Stock Exchange Group.

While covering all the Technical Analysis bases, his groundbreaking work in Price Prediction is increasingly recognised as being at the forefront of technical trading techniques. Linton Price Targets are now available on the Bloomberg Professional Terminal. He remains an active trader and investor.

Technical Analysis Course - typical outline

This two-day, 8 module course is specially designed to provide traders and analysts with an in-depth understanding of a high level of technical analysis, enabling them to make informed investment decisions and manage trading positions effectively with improved market timing. Participants will learn key technical analysis tools, indicators, and strategies to enhance their ability to analyse and trade financial markets.

There is a great deal of practical live analysis of markets which traders and analysts can put into practice quickly and effortlessly. We ask course attendees to present their own chart analysis during the training to ensure they have retained the teaching.

We will provide a short online survey for course attendees to fill out ahead of the course to help us structure the course content in line with each trader's experience ahead of the course. We also provide an exam. Course workbook and training videos as an adjunct to the course.

- Summary of what we learned
- Taking your knowledge further

Leaders in Training Energy Trading Teams

*Highly engaging,
tailored content with
live application of the
skills taught for the
markets that you
actually trade*

“David spent 2 days with the trading team and provided a lot of value. We covered the technical indicators, patterns and shapes, but it was the fundamental interpretation of a chart and the behaviour it represents that was the real value. He identified the types of markets charts describe, to adapt your technical approach accordingly, and to trust your gut and preserve your capital. Some really important lessons and truisms for our less experienced traders to absorb and for our experienced traders too, great to be reminded of the golden rules. Well worth the time and spend.” Head of Grain Trading, Perth Australia

“I have been following your work for many years. It was a pleasure to host you at our premises, listen to your lectures, and engage in discussions with you. What I value most is how you tailored the lectures and adapted the discussion specifically to our group and our trading and portfolio management strategies. You also highlighted topics and tools that we can start using immediately, without any unnecessary distractions. These qualities are a true testament to your expertise and extensive experience”

CEO, Energy Trading Firm
